Appln. No.: 09/936,985 Group Art Unit: 1645

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the

application:

Listing of Claims:

Claim 1 (Currently amended): An immunogenic composition comprising at least one

Streptococcus pneumoniae polysaccharide-protein conjugate, formulated with at least one

Streptococcus pneumoniae protein antigen, and an adjuvant which is a preferential inducer of

a TH1 response.

Claim 2 (Previously presented): The immunogenic composition of claim 1, wherein the

protein antigen is an outer surface protein or a secreted protein of Streptococcus pneumoniae.

Claim 3 (Previously presented): The immunogenic composition of claim 1, wherein the

protein antigen is a toxin, adhesion or lipoprotein of Streptococcus pneumoniae.

Claim 4 (Previously presented): The immunogenic composition of claim 1, wherein the

protein antigen is selected from the group: pneumolysin, PspA or transmembrane deletion

variants thereof, PspC or transmembrane deletion variants thereof, PsaA or transmembrane

deletion variants thereof, glyceraldehyde-3-phosphate dehydrogenase, and CbpA or

transmembrane deletion variants thereof.

Claim 5 (Cancelled).

Claim 6 (Previously presented): The immunogenic composition of claim 1, wherein the

protein conjugate is selected from the group consisting of: Diphtheria toxoid, Tetanus toxoid,

CRM197, Keyhole Limpet Haemocyanin (KLH), protein derivative of Tuberculin (PPD), and

protein D from H. influenzae.

Claim 7 (Previously presented): An immunogenic composition of claim 1 which comprises

at least four pneumococcal polysaccharide antigens from different serotypes.

2

Appln. No.: 09/936,985 Group Art Unit: 1645

Claim 8 (Previously presented): An immunogenic composition as claimed in claim 1, wherein the adjuvant comprises at least one of the following: 3D-MPL, a saponin immunostimulant, or an immunostimulatory CpG oligonucleotide.

Claim 9 (Original): An immunogenic composition as claimed in claim 8, wherein the adjuvant comprises a carrier selected from the group comprising: an oil in water emulsion, liposomes, and an aluminium salt.

Claim 10 (Cancelled).

Claim 11 (Previously presented): A vaccine comprising the immunogenic composition of claim 1.

Claim 12 (Withdrawn): A method of preventing or ameliorating *Streptococcus pneumoniae* infection in a patient over 55 years of age, comprising administering an effective amount of a vaccine comprising a *Streptococcus pneumoniae* polysaccharide, at least one *Streptococcus pneumoniae* protein, and a TH1 inducing adjuvant.

Claim 13 (Cancelled).

Claim 14 (Withdrawn): A method of making the immunogenic composition of claim 1, comprising the steps of:

selecting one or more pneumococcal polysaccharide antigen(s); selecting one or more pneumococcal protein antigen(s); selecting a TH1 inducing adjuvant; and mixing said polysaccharide and protein antigens and adjuvant with a suitable excipient.

Claim 15 (Withdrawn): A method of preventing or ameliorating Otitis media in Infants, comprising administering a safe and effective amount of a vaccine comprising a *Streptococcus pneumoniae* polysaccharide antigen, a *Streptococcus pneumoniae* protein antigen and a TH1 inducing adjuvant, to said Infant.
